Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal. 376 pages, with more than 300 illustrations, diagrams and charts, size 5.5 x 8.5 inches. Originally published under the title, Corvair Owner's Handbook of Maintenance & Repair by Floyd Clymer, this edition was republished in 2016 by VelocePress. Written in easy to understand language, this is possibly the most user-friendly and comprehensive owner's workshop manual ever published for all variations of the Chevrolet Corvair. There are detailed instructions for the overhaul, service and maintenance of the major mechanical and electrical components including a comprehensive section on the maintenance and repair of the turbocharger and the various carburetor systems fitted to this series of cars. In addition, there is a separate 100 plus page section that deals with the maintenance and repair of the mechanical modifications that are specific to the 1965 and later models. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Chevrolet Corvair owners, restorers and enthusiasts worldwide. Hundreds of photos and diagrams.

- \* Do you own a clock that is special to you that has stopped working, perhaps a gift or a family heirloom? This book is for you.
- \* Do you like to tinker with mechanical things? This book is for you.
- \* Have you taken a clock apart but can't get it back together? This book is for you.
- \* Are you fascinated with clocks, have several you have bought but do not work? This book is for you.

Many times, the problem is simple to correct. Be bold. Take on your project. This book will hold your hand every step of the way and guide you to success. **YOU CAN DO IT.**

Why does an Anniversary Clock stop Working? Most likely, it is because the suspension spring is broken. I will teach you how to replace it.

Often, the works are dirty, need oiling, or most likely both. When the clock stops, think of it as "the oil light is on." It's a "cry for help." Without oil, the metal parts grind on each other, causing severe wear and damage. Oil also attracts dust, making the oil "gummy" and adding drag to its operation until it can no longer overcome the friction. If a clock is oiled regularly [every three to five years], chances are you will only ever need to re-oil your clock. If the clock is allowed to run until it stops, the only sure way to service it is to remove the works from its case, dismantle the parts, clean, service, and put the movement back together with fresh oil and correct adjustment.
