Jonathan Safran Foer emerged as one of the most original writers of his generation with his best-selling debut novel, *Everything Is Illuminated*. Now, with humor, tenderness, and awe, he confronts the traumas of our recent history. What he discovers is solace in that most human quality, imagination. Meet Oskar Schell, an inventor, Francophile, tambourine player, Shakespearean actor, jeweler, pacifist, correspondent with Stephen Hawking and Ringo Starr. He is nine years old. And he is on an urgent, secret search through the five boroughs of New York. His mission is to find the lock that fits a mysterious key belonging to his father, who died in the World Trade Center on 9/11. An inspired innocent, Oskar is alternately endearing, exasperating, and hilarious as he careens from Central Park to Coney Island to Harlem on his search. Along the way he is always dreaming up inventions to keep those he loves safe from harm. What about a birdseed shirt to let you fly away? What if you could actually hear everyone's heartbeat? His goal is hopeful, but the past speaks a loud warning in stories of those who've lost loved ones before. As Oskar roams New York, he encounters a motley assortment of humanity who are all survivors in their own way. He befriends a 103-year-old war reporter, a tour guide who never leaves the Empire State Building, and lovers enraptured or scorned. Ultimately, Oskar ends his journey where it began, at his father's grave. But now he is accompanied by the silent stranger who has been renting the spare room of his grandmother's apartment. They are there to dig up his father's empty coffin. Conservationist Grant Fowlds lives to save and protect Africa's rhinos, elephants and other iconic wildlife, to preserve their habitats, to increase their range and bring back the animals where they have been decimated by decades of war, as in Angola, Mozambique and the Democratic Republic of the Congo. This vivid account of his work tells of a fellow conservationist tragically killed by the elephants he was seeking to save and a face-off with poachers, impoverished rural people exploited by rapacious local businessmen. Fowlds describes the impact of the Covid pandemic on conservation efforts, the vital wildlife tourism that sustains these and rural communities; and tells of conservationists' efforts to support people through the crisis. Lockdowns may have brought a welcome lull in rhino and other poaching, but also brought precious tourism to a standstill. He shows how the pandemic has highlighted the danger to the world of the illicit trade in endangered wildlife, some of it sold in 'wet markets', where pathogens incubate and spread. He describes a restoration project of apartheid-era, ex-South African soldiers seeking to make reparations in Angola, engulfed for many years in a profoundly damaging

civil war, which drew in outside forces, from Cuba, Russia and South Africa, with a catastrophic impact on that country's wildlife. Those who fund conservation, whether in the US, Zambia or South Africa itself, are of vital importance to efforts to conserve and rewild: some supposed angel-investors turn out to be not what they had appeared, some are thwarted in their efforts, but others are open-hearted and generous in the extreme, which makes their sudden, unexpected death an even greater tragedy. A passionate desire to conserve nature has also brought conservationists previously active in far-off Venezuela to southern Africa. Fowlds describes fraught meetings to negotiate the coexistence of wildlife and rural communities. There are vivid accounts of the skilled and dangerous work of using helicopters to keep wildebeest, carrying disease, and cattle apart, and to keep elephants from damaging communal land and eating crops such as sugar cane. He tells of a project to restore Africa's previously vast herds of elephants, particularly the famed 'tuskers', with their unusually large tusks, once prized and hunted almost to extinction. The range expansion that this entails is key to enabling Africa's iconic wildlife to survive, to preserving its wilderness and, in turn, helping humankind to survive. There is a heartening look at conservation efforts in Mozambique, a country scarred by years of war, which are starting to bear fruit, though just as a new ISIS insurgency creates havoc in the north of the country. What will humanity's relationship with nature be post-pandemic? Will we have begun to learn that by conserving iconic wildlife and their habitats we help to preserve and restore precious pockets of wilderness, which are so vital not only the survival of wildlife, but to our own survival on our one precious planet. From the author of "Jews, Muslims and Mass Media" comes the hidden history and secret location of one of the world's most sacred objects. In remembrance of the 75th anniversary of the liberation of Auschwitz and the Nazi concentration camps, this award-winning, bestselling work of Holocaust fiction, inspiration for the classic film and "masterful account of the growth of the human soul" (Los Angeles Times Book Review), returns with an all-new introduction and beautifully redesigned cover. An "extraordinary" (New York Review of Books) novel based on the true story of how German war profiteer and factory director Oskar Schindler came to save more Jews from the gas chambers than any other single person during World War II. In this milestone of Holocaust literature, Thomas Keneally, author of *The Book of Science and Antiquities* and *The Daughter of Mars*, uses the actual testimony of the Schindlerjuden—Schindler's Jews—to brilliantly portray the courage and cunning of a good man in the midst of unspeakable evil. "Astounding...in this case the truth is far more powerful than anything the imagination could invent" (Newsweek). Discusses what wedges are and how they are used. From armadillo to

zebra, this enchanting picture book pairs the stunning photography of National Geographic photographer Joel Sartore with playful poems by New York Times best-selling author Debbie Levy to represent the letters of the alphabet and celebrate the diversity of the animal world. This unique alphabet book is a dazzling journey through the animal kingdom. It invites children and their families to linger over Sartore's spectacular portraits of animals both familiar and little known, to look these incredible creatures in the eye and marvel at their shape, form, and expression. Each animal is showcased in an original poem by Levy, whose clever, quirky verse and exuberant wordplay will delight readers young and old. The photos are part of Sartore's mission to photograph all the animal species in human care, with special attention given to rare and endangered species. A beautiful gift book for animal lovers of any age, and a very special read-aloud ABC book for young children. After 2,500 Years of Mystery, the Truth About the Ark of the Covenant Is Revealed The Lost Ark of the Covenant is the real-life account of an astounding quest—professor Tudor Parfitt's effort to recover the revered artifact that contained the Ten Commandments, sacred to Judaism, Christianity, and Islam. With painstaking historical scholarship, groundbreaking genetic science, and fascinating on-the-ground discoveries, Parfitt, who the Wall Street Journal calls "a British Indiana Jones," debunks the previous myths and reveals the shocking history of the Ark and its keepers. David Childress, popular author and star of the History Channel's show Ancient Aliens, takes us on an incredible journey in search of the truth about (and science behind) the fantastic Biblical artifact known as the Ark of the Covenant. This object made by Moses at Mount Sinai—part wooden-metal box and part golden statue—had the power to create “lightning” to kill people, and also to fly and lead people through the wilderness. Featured in such popular movies as Raiders of the Lost Ark by Lucas and Spielberg, the Ark of the Covenant is probably the most mysterious object in the Old Testament—what was it? Was it an ancient electrical device? The Ark of the Covenant suddenly disappears from the Bible record and what happened to it is not mentioned. Was it hidden in the underground passages of King Solomon's temple and later discovered by the Knights Templar? Was it taken through Egypt to Ethiopia as many Coptic Christians believe? Childress looks into hidden history, astonishing ancient technology, and a 3,000-year-old mystery that continues to fascinate millions of people today. In a disturbingly violent world, four brilliant misfits are thrown together in a group home for troubled youth. Miranda, Doug, Taryn, and Elijah discover their minds have powers they could never have imagined. Drawn together by their deep concern for the future, they embark on a mission to stop the violence engulfing the world. True Raiders is The Lost City of Z meets The Da Vinci Code, from critically acclaimed author Brad Ricca. This book tells the untold true story of Monty Parker, a British rogue nobleman who, after being dared to do so by Ava Astor, the so-called “most beautiful woman in the world,” headed a secret 1909 expedition to find the fabled Ark of the Covenant. Like a real-life version of Raiders of the Lost Ark, this incredible story of adventure and mystery has almost been completely forgotten today. In 1908, Monty is approached by a strange Finnish scholar named Valter

Juvelius who claims to have discovered a secret code in the Bible that reveals the location of the Ark. Monty assembles a ragtag group of blueblood adventurers, a renowned psychic, and a Franciscan father, to engage in a secret excavation just outside the city walls of Jerusalem. Using recently uncovered records from the original expedition and several newly translated sources, True Raiders is the first retelling of this group's adventures— in the space between fact and faith, science and romance. The Ark of the Covenant is the source of one of the deepest mysteries of the Western world. Laurence Gardner has accessed Rosicrucian archives to reveal where the Ark is, what it is and how this lost secret of the distant past has led to the phenomenal new science of space-time manipulation. Mariska lives on an island with her father and six sisters. She wants to become a circus girl. Even though she knows this seems impossible, she stubbornly holds on to her dream... One day, life on the island changes in the most incredible way as it seems to merge one ridiculous adventure into another... This leaves Mariska with the most unexpected, exotic, and dangerous characters and situations to sort out... Realizing what is happening, she wonders if fate is against her... or, perhaps, for her? Another compulsive page turner from the hand of Josephine Van Den Berg, which will take you on an amazing, hilarious, exciting rollercoaster reading ride... After waiting for centuries, Max and Liz finally receive their mission from the Maker to work behind the scenes in the life of Joseph. A dazzling and stunningly illustrated introduction to the diversity of life on our planet. A truly inclusive celebration of architecture around the world and across the ages. The astonishing story of the soldiers, conservationists, and ordinary Iraqis who united to save the animals of the Baghdad Zoo When the Iraq war began, conservationist Lawrence Anthony could think of only one thing: the fate of the Baghdad Zoo, caught in the crossfire at the heart of the city. Once Anthony entered Iraq he discovered that hostilities and uncontrolled looting had devastated the zoo and its animals. Working with members of the zoo staff and a few compassionate U.S. soldiers, he defended the zoo, bartered for food on war-torn streets, and scoured bombed palaces for desperately needed supplies. Babylon's Ark chronicles Anthony's hair-raising efforts to save a pride of Saddam's lions, close a deplorable black-market zoo, run ostriches through shoot-to-kill checkpoints, and rescue the dictator's personal herd of Thoroughbred Arabian horses. A tale of the selfless courage and humanity of a few men and women living dangerously for all the right reasons, Babylon's Ark is an inspiring and uplifting true-life adventure of individuals on both sides working together for the sake of magnificent wildlife caught in a war zone. “towering, swash-buckling thrill of a book” (Newsweek), hailed as Chabon's “magnum opus” (The New York Review of Books), *The Amazing Adventures of Kavalier & Clay* is a triumph of originality, imagination, and storytelling, an exuberant, irresistible novel that begins in New York City in 1939. A young escape artist and budding magician named Joe Kavalier arrives on the doorstep of his cousin, Sammy Clay. While the long shadow of Hitler falls across Europe, America is happily in thrall to the Golden Age of comic books, and in a distant corner of Brooklyn, Sammy is looking for a way to cash in on the craze. He finds the ideal partner in the aloof, artistically gifted Joe, and together they embark on an adventure that takes them deep into the heart of Manhattan, and the heart of old-fashioned American ambition. From the shared fears, dreams, and desires of two teenage boys, they spin comic book tales of the heroic, fascist-fighting Escapist and the beautiful, mysterious Luna Moth, otherworldly mistress of the night. Climbing from the streets of Brooklyn to the top of the Empire State Building, Joe and Sammy carve out lives, and careers, as vivid as cyan and magenta ink. Spanning continents and eras, this superb book by one of America's finest writers remains one of the defining novels of our modern American age. Winner of the Bay Area Book Reviewers Award and the New York Society Library Book Award

More than 150 projects are described and illustrated in lavish detail. A magical adventure of animals traveling worldwide to Noah's ark. In this book, we have hand-picked the most sophisticated, unanticipated, absorbing (if not at times crackpot!), original and musing book reviews of "Babylon's Ark: The Incredible Wartime Rescue of the Baghdad Zoo." Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all. A conservationist traces his efforts to save the endangered White Rhino, describing the bureaucratic forces he navigated to establish protections and his work as a chief negotiator between the violent Lord's Resistance Army and the Ugandan government. T-Rex on Noah's Ark? Right! How did Noah feed him without being fed to him? Not only does this book

address the issues of Creation and evolution from scientific and biblical perspectives, it also chronicles the author's personal journey to discover and document the remains of Noah's Ark (1997, '98, '99, 2000, '01, '03, '05) and discusses the overwhelming significance of potential discovery. For anyone educated in American schools (especially secular colleges and universities), the topics, such as those addressed below, will be both challenging and eye-opening. Discover compelling answers to these questions: [ What if the story of dinosaurs existing millions of years ago is a myth designed to bolster belief in an evolutionary process, but completely devoid of actual evidence? [ What if dinosaurs were brought onto Noah's Ark along with all other air-breathing land animals and survived a global flood? [ What if the various (and varying) accounts of "Ice Ages" on Earth are fictitious and have spiritual roots linked to the belief in evolution? [ What if the remains of Noah's Ark were found in the upper reaches of Mt. Ararat in eastern Turkey? David Childress, popular author and star of the History Channel's show Ancient Aliens, takes us on an incredible journey in search of the truth about (and science behind) the fantastic Biblical artifact known as the Ark of the Covenant. When South African conservationist Lawrence Anthony was asked to accept a herd of "rogue" wild elephants on his Thula Thula game reserve in Zululand, his common sense told him to refuse. But he was the herd's last chance of survival: they would be killed if he wouldn't take them. In order to save their lives, Anthony took them in. In the years that followed he became a part of their family. And as he battled to create a bond with the elephants, he came to realize that they

had a great deal to teach him about life, loyalty, and freedom. The Elephant Whisperer is a heartwarming, exciting, funny, and sometimes sad account of Anthony's experiences with these huge yet sympathetic creatures. Set against the background of life on an African game reserve, with unforgettable characters and exotic wildlife, it is a delightful book that will appeal to animal lovers and adventurous souls everywhere. Another extraordinary story of life on a South African game reserve from the authors of The Elephant Whisperer. Lawrence Anthony's South African game reserve is home to many animals he has saved, from a remarkable herd of elephants to a badly behaved bushbaby called George. Described as "the Indiana Jones of conservation", when one of his rhinos was brutally slaughtered for her horn, he didn't hesitate to lead an armed response against the poachers. Then he learned that there were only a handful of northern white rhinos left in the wild, living in an area of the Congo controlled by the infamous Lord's Resistance Army and soon to be hunted into extinction. Lawrence knew he had to take action. What followed was an extraordinary adventure, as he headed into the jungle to negotiate with the rebels, while battling to save his own animals from terrible drought and to save the eyesight of his beloved elephant matriarch Nana. The Last Rhinos is peopled with unforgettable characters, both human and animal, and is a sometimes funny, sometimes moving, always exciting read. See once again why true science honors the pages of the Bible. This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he

may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.
