The Oxford Handbook of the Word Dec 18 2022 This handbook addresses words in all their multifarious aspects and brings together scholars from every relevant discipline to do so. The many subjects covered include word frequencies; sounds and sound symbolism; the structure of words; taboo words; lexical borrowing; words in dictionaries and thesauri; word origins and change; place and personal names; nicknames; taxonomies; word acquisition and bilingualism; words in the mind; word disorders; and word games, puns, and puzzles. Words are the most basic of all linguistic units, the aspect of language of which everyone is likely to be most conscious. A 'new' word that makes it into the OED is prime news; when baby says its first word its parents reckon it has started to speak; knowing a language is often taken to mean knowing its words; and languages are seen to be related by the similarities between their words. Up to the twentieth century linguistic description was mainly an account of words and all the current subdivisions of linguistics have something to say about them. A notable feature of human languages is the sheer vastness of their word inventories, and scholars and writers have sometimes deliberately increased the richness of their languages by coining or importing new items into their word-hoards. The book presents scholarship and research in a manner that meets the interests of students and professionals and satisfies the curiosity of the educated reader.

Crossworld Feb 08 2022 Sixty-four million people do it at least once a week. Nabokov wrote about it. Bill Clinton even did it in the White House. The crossword puzzle has arguably been our national obsession since its birth almost a century ago. Now, in *Crossworld*, writer, translator, and lifelong puzzler Marc Romano goes where no Number 2 pencil has gone before, as he delves into the minds of the world's cleverest crossword creators and puzzlers, and sets out on his own quest to join their ranks. While covering the American Crossword Puzzle Tournament for the Boston Globe, Romano was amazed by the skill of the competitors and astonished by the cast of characters he came across—like Will Shortz, beloved editor of the New York Times puzzle and the only academically accredited “enigmatologist” (puzzle scholar); Stanley Newman, Newsday's puzzle editor and the fastest solver in the world; and Brendan Emmett Quigley, the wickedly gifted puzzle constructor and the Virgil to Marc's Dante in his travels through the crossword inferno. Chronicling his own journey into the world of puzzling—even providing tips on how to improve crosswording skills—Romano tells the story of crosswords and word puzzles themselves, and of the colorful people who make them, solve them, and occasionally become consumed by them. But saying this is a book about puzzles is to tell only half the story. It is also an explanation into what crosswords tell us about ourselves—about the world we live in, the cultures that nurture us, and the different ways we think and learn. If you're a puzzler, *Crossworld* will enthrall you. If you have no idea why your spouse spends so much time filling letters into little white squares, *Crossworld* will tell you – and with luck, save your marriage. *CROSSWORD | by Marc Romano ACROSS 1.
