While they are not afraid to take chances, the most successful entrepreneurs do what they can to anticipate, minimize, and offset risk at every opportunity, insists Bob Reiss, who in his own flourishing entrepreneurial career has managed to turn risk reduction into a science. Now this successful self-starter, whose exploits have been featured in The Wall Street Journal and have become case studies for Harvard Business School classes, shares the lessons of a lifetime. By following his own prescription for managing risk, and using real-life success stories from experienced entrepreneurs, Reiss covers every obstacle the entrepreneur is likely to encounter. Where do ideas come from and how do you get started? Where can you find money and expert advice? How do you hire the best people and build credibility? How do you get orders and reorders? How do you develop and introduce successful products? Should you go public? Through every step in the process, Reiss emphasizes how risk can be anticipated, managed, and significantly reduced. Full of practical suggestions and insights, this easy-to-read book is an indispensable guide for anyone thinking about starting a business and particularly for those would-be entrepreneurs without experience or much capital. It is equally valuable to entrepreneurs looking for ways to make their businesses more successful. How do visual images shape the practice of medicine? What role does visual representation play in the cultivation of medical ways of seeing? And how has medicine's visual culture changed in the digital age? Kirsten Ostherr's ambitious study explores 120 years of medical image-making to explain how visual representations shape medical education and practice. Marshaling powerful, vivid examples she demonstrates how medical images created by the healthcare industry, documentary filmmakers, experimental artists, and the mass media acquire cultural meaning and influence doctors' and patients' understandings of health and disease. Her analysis proceeds chronologically, turning from the earliest experiments with medical filmmaking by the American College of Surgeons, to the place of health films in the "golden age" of instructional film in the 1960s. Ostherr considers the shift to television as the dominant medium of health education, highlighting the evolving status of realism, the techniques employed to bridge the entertainment-education divide, the role of expert consultants and sponsors, and the tradeoffs made by professionals to reach a broad audience. The rise of physician advice segments on newsmagazines forms a transition between medical dramas like Marcus Welby, MD and more recent reality shows like Boston Med and Doctor 90210. Concluding with a section on advertising and social media in the health care setting, the book ends with ten key lessons for the future of medical media.
