The Oxford Handbook of Criminology Sep 14 2022 Beginning with the history of criminology this updated and revised edition deals with topics as diverse as policing, substance abuse, juvenile crime, statistics, prisons, victims, and organised crime in Britain.

Qualitative Research in Criminology Feb 07 2022 "This volume investigates the significant role qualitative research plays in expanding and refining our understandings of crime and justice. It features seventeen original essays that discuss the relationship between methodology and theory. The result is a theoretically engaged volume that explores the approaches of qualitative scholars in the collection and treatment of data in criminological scholarship. Among the key issues addressed in the volume are methodological rigor in qualitative research; movement between method, theory building, theoretical refinement and expansion; diversity of qualitative methodologies, from classic field research to contemporary innovations; and considerations of the future of qualitative criminological research. Qualitative research use has expanded rapidly in the last twenty years. This latest volume of *Advances in Criminological Theory* presents a cogent appraisal of qualitative criminology and the ways in which rigorous qualitative research contributes to theorizing about crime and justice."

The Psychology of Restorative Justice Oct 23 2020 This ground-breaking collection dares to take the next step in the advancement of an autonomous, interdisciplinary restorative justice field of study. It brings together criminology, social psychology, legal theory, neuroscience, affect-script psychology, sociology, forensic mental health, political sciences, psychology and positive psychology to articulate for the first time a psychological concept of restorative justice. To this end, the book studies the power structures of the restorative justice movement, the very psychology, motivations and emotions of the practitioners who implement it as well as the drivers of its theoreticians and researchers. Furthermore, it examines the strengths and weakness of our own societies and the communities that are called to participate as parties in restorative justice. Their own biases, hunger for power and control, fears and hopes are investigated. The psychology and dynamics between those it aims to reach as well as those who are funding it, including policy makers and politicians, are looked into. All these questions lead to creating an understanding of the psychology of restorative justice. The book is essential reading for academics, researchers, policymakers, practitioners and campaigners.

An Introduction to Green Criminology and Environmental Justice Jun 18 2020 A comprehensive introduction to green criminology, this book is a discussion of the relationship between mainstream criminal justice and green crimes. Focused on environmental harm within the context of criminal justice this book takes a global perspective and introduces students to different theoretical perspectives in green criminology. Looks at the victims of environmental crime throughout. Covers topics such as; wildlife crimes, animal abuse, the causes of environmental crime, regulation, exploitation, environmental activism, policing, prosecution and monitoring. Designed to help readers develop a thorough understanding of the principles of environmental justice and green criminology, as well as contemporary developments, this book will be excellent support to students of green criminology and environmental crime.

Reflexivity in Criminological Research Jul 20 2020 This comprehensive collection contributes to, advances and consolidates discussions of the range of research methods in criminology through the presentation of diverse international case studies in which contributors reflect upon their experiences with powerless and powerful individuals or groups.

Criminology and Democratic Politics Sep 21 2020 Criminology and Democratic Politics brings together a range of international leading experts to consider the relationship between criminology and democratic politics. How does criminology relate to democratic politics? What has been the impact of criminology on crime and justice? How can we make sense of the uses, non-uses, and abuses of criminology? Such questions are far from new, but in recent times they have moved to the centre of debate in criminology in different parts of the world. The chapters in *Criminology and Democratic Politics* aim to contribute to this global debate. Chapters cover a range of themes such as punishment, knowledge, and penal politics; crime, fear, and the media; democratic politics and the uses of criminological knowledge; and the public role of criminology. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, and politics and all those interested in how criminology relates to democratic politics in modern times.

Greening Criminology in the 21st Century Nov 04 2021 In the 21st century, environmental harm is an ever-present reality of our globalised world. Over the last 20 years, criminologists, working alongside a range of other disciplines from the social and physical sciences, have made great strides in their understanding of how different institutions in society, and criminal justice systems in particular – respond – or fail to respond – to the harm imposed on ecosystems and their human and non-human components. Such research has crystallised into the rapidly evolving field of green criminology. This pioneering volume, with contributions from leading experts along with younger scholars, represents the state of the art in criminologists' pursuit of understanding in the environmental sphere while at the same time challenging academics, lawmakers and policy developers to explore new directions in the study of environmental harm.

Criminological Approaches to International Criminal Law Nov 11 2019 A practical guide to what motivates international crimes and how these are structured and investigated in theory and practice.

Convict Criminology for the Future Jan 26 2021 Bringing together a variety of diverse international contributors from the Convict Criminology community, *Convict Criminology for the Future* surveys the historical roots of Convict Criminology, the current challenges experienced by formerly incarcerated people, and future directions for the field. Over the past two decades research has been conducted in the field of Convict Criminology, recognizing that the convict voice has long been ignored or marginalized in academia, criminal justice practice, and public policy debates. This edited volume provides a much-needed update on the state of the field and how it has evolved. Seven primary themes are examined. Historical underpinnings of Convict Criminology Adaptations to prison life Longstanding challenges for prisoners and formerly incarcerated people Post-secondary education behind bars The expansion of Convict Criminology beyond North America Conducting scholarly research in carceral settings Future directions in Convict Criminology A global line up of contributors, from the fields of Criminology, Criminal Justice, Law, Political Science, and Sociology, comprehensively tackle each topic, reviewing causes, reactions, and solutions to challenges. The volume also includes a chronology of significant events in the history of Convict Criminology. Integrating current events with research using a variety of methods in scholarly analysis, *Convict Criminology for the Future* is invaluable reading for students and scholars of corrections, criminology, criminal justice, law, and sociology.

Contemporary Critical Criminology Dec 13 2019 The concept of critical criminology – that crime and the present-day processes of criminalization are rooted in the core structures of society – is of more relevance today than it has been at any other time. Written by an internationally renowned scholar, *Contemporary Critical Criminology* introduces the most up-to-date empirical, theoretical, and political contributions made by critical criminologists around the world. In its exploration of this material, the book also challenges the erroneous but widely held notion that the critical criminological project is restricted to mechanically applying theories to substantive topics, or to simply calling for radical political, economic, cultural, and social transformations. Now fully updated and expanded in a new edition, this book offers further coverage of new directions in critical criminology, covering topics such as: Green criminology Indigenous criminology Intersectionality Narrative criminology Rural critical criminology Queer criminology Zemiology Critical research methods Contemporary critical criminological policies Written in a clear and direct style, this book is an essential source of reference for both undergraduate and postgraduate students of criminology, deviance and social control, criminological theory, social policy, research methodology, and criminal justice.

States of Violence and the Civilising Process Mar 16 2020 This book offers a distinctive and novel approach to state-sponsored violence, one of the major problems facing humanity in the previous and now the twenty-first century. It addresses the question: how is it possible that large numbers of ordinary men and women are able to do the killing, torturing and violence that defines crimes against humanity? In his striking analysis, Rob Watts shows how and why states, of all political persuasions, engage in crimes against humanity, including: genocide, homicide, torture, kidnapping, illegal surveillance and detention. This book advances a new interpretive frame. It argues against the 'civilizing process' model, showing how both states and social sciences like sociology and criminology have been complicit in splitting 'the social' from 'the ethical' while accepting too complacently that modern states are the exemplars of morality and rationality. The book makes the case that it is possible to bring together in the one interpretive frame, our understanding of social action involving personal motivation and ethical responsibility and patterns of collective social action operating in terms of the agencies of 'the State'. Rob Watts identifies and charts the pathways of action and 'practical' (i.e. ethical) judgements which the perpetrators of these crimes against humanity constructed for themselves to make sense of what they were doing. At once challenging and highly accessible, the book reveals the policy-making processes that produce state crime as well as showing how ordinary people do the state's dirty work.

Dirty Assets Mar 08 2022 Adopting a multi-disciplinary and comparative approach, this book focuses on the emerging and innovative aspects of attempts to target the accumulated assets of those engaged in criminal and terrorist activity, organized crime and corruption. It examines the 'follow-the-money' approach and explores the nature of criminal, civil and regulatory responses used to attack the financial assets of those engaged in financial crime in order to deter and disrupt future criminal activity as well as terrorism networks. With contributions from leading international academics and practitioners in the fields of law, economics, financial management, criminology, sociology and political science, the book explores law and practice in countries with significant problems and experiences, revealing new insights into these dilemmas. It also discusses the impact of the 'follow-the-money' approach on human rights while also assessing effectiveness. The book will appeal to academics and researchers of financial crime, organized crime and terrorism as well as practitioners in the police, prosecution, financial and taxation agencies, policy-makers and lawyers.

Gendering Criminology May 10 2022 *Gendering Criminology* provides a contemporary guide for understanding the role of gender in criminal engagement and experiences as well as reactions to these offenses among laypersons and agents of social control. The textbook provides evidence for the argument that gender socially situates people in their risks for criminal engagement, victimization, and what occurs in the aftermath of crime: arrest, the judicial process, and sentencing. Aside from investigating the role of men and women, the authors also explore the experiences of LGBTQIA+ communities involved in or working within the criminal-legal system. The volume provides a comprehensive account of various offenses—violent and nonviolent—and individual motivations, drives, and methods, to help students develop the skills they need to work as professionals in and around the criminal-legal system. Key features: Applies theoretical concepts to real-life applications, media bytes, and case studies Includes new and timely information regarding gender and online victimization Provides an overview of each topic within eleven chapters, delving into the literature in each area Promotes active learning activities in each chapter to fully immerse and engage students in the material

Criminology and War Oct 03 2021 It is widely observed that the study of war has been paid limited attention within criminology. This is intellectually curious given that acts of war have occurred persistently throughout history and perpetuate criminal acts, victimisation and human rights violations on a scale unprecedented with domestic levels of crime. However, there are authoritative voices within criminology who have been studying war from the borders of the discipline. This book contains a selection of criminological authors who have been authoritatively engaged in studying criminology and war. Following an introduction that 'places war within criminology' the collection is arranged across three themed sections including: Theorising War, Law and Crime; Linking War and Criminal Justice; and War, Sexual Violence and Visual Trauma. Each chapter takes substantive topics within criminology and victimology (i.e. corporate crime, history, imprisonment, criminal justice, sexual violence, trauma, security and crime control to name but a few) and invites the reader to engage in critical discussions relating to wars both past and present. The chapters within this collection are theoretically rich, empirically diverse and come together to create the first authoritative published collection of original essays specifically dedicated to criminology and war. Students and researchers alike interested in war, critical criminology and victimology will find this an accessible study companion that centres the disparate criminological attention to war into one comprehensive collection.

Criminology Jan 06 2022 Comprehensive, critical and accessible, *Criminology: A Sociological Introduction* offers an authoritative overview of the study of criminology, from early theoretical perspectives to pressing contemporary issues such as the globalisation of crime, crimes against the environment, terrorism and cybercrime. Authored by an internationally renowned and experienced group of authors in the Department of Sociology at the University of Essex, this is a truly international criminology text that delves into areas that other texts may only reference. It includes substantive chapters on the following topics: • Histories of crime; • Theoretical approaches to crime and the issue of social change; • Victims and victimisation; • Crime, emotion and social psychology; • Drugs, alcohol, health and crime; • Criminal justice and the sociology of punishment; • Green criminology; • Crime and the media; • Terrorism, state crime and human rights. The new edition fuses global perspectives in criminology from the contexts of post-Brexit Britain and America in the age of Trump, and from the Global South. It contains new chapters on cybercrime; crimes of the powerful; organised crime; life-course approaches to understanding delinquency and desistance; and futures of crime, control and criminology. Each chapter includes a series of critical thinking questions, suggestions for further study and a list of useful websites and resources. The book also contains a glossary of the criminological terms and concepts used in the book. It is the perfect text for students looking for a broad, critical and international introduction to criminology, and it is essential reading for those looking to expand their 'criminological imagination'.

Visual Criminology Feb 24 2021 This edited collection captures the expertise of scholars from the US, the UK, Australia, and Canada to catalog the rise in visual approaches in criminology. It presents examples of visual methods, uses, and approaches in criminology; assesses the potential for new graphic approaches to collect, analyze, and present data; and provides some analysis of the use of images in teaching, to spur social critique, and guide policy translation. The collection visually connects theory and practice by highlighting the work of criminologists who have embraced the visual turn. Contributors explore the use of cognitive maps, concept and mind maps, life history calendars, CCTV, life plots, GIS and hot spot research, policy graphs, visual abstracts and research summaries, and other visual tools in the context of criminology. Approaches building on visual sociology are also featured, including a discussion of developments in documentary photography and film, visual ethnography, and sensory phenomenology. The book is organized thematically, with each chapter following logically upon the last, introducing readers to a variety of visual approaches and their application in criminology. The goals of this collected volume are three-fold. The first is to highlight how the visual has been used in criminology historically to present data, contest meaning and complicate social control, and make more transparent the research process. The second is to work toward some sort of definitional consistency. While a worthy endeavor, this remains elusive given the assortment of uses and varying traditions from which visual criminology has emerged. The third is to try to think clearly about the role of humility. This means a willingness to acknowledge an epistemological framework and note the variety of limitations associated with trying to understand in deep and meaningful ways. For visual criminology specifically, it involves the recognition that part of the power of images (whatever their construction), comes from whether we think they are beautiful or whether and/or to what extent they disrupt our understanding in one way or another. This interdisciplinary book will be of interest to criminologists, sociologists, visual ethnographers, historians and those engaged with media studies. It is a valuable supplementary text for courses in introductory criminology and criminal justice, criminological theory, research methods, and other upper-level and senior capstone courses.

Routledge International Handbook of Green Criminology Nov 16 2022 The Routledge International Handbook of Green Criminology was the first comprehensive and international anthology dedicated to green criminology. It presented green criminology to an international audience, described the state of the field, offered a description of a range of environmental issues of regional and global importance, and argued for continued criminological attention to environmental crimes and harms, setting an agenda for further study. In the six years since its publication, the field has continued to grow and thrive. This revised and expanded second edition of the Handbook reflects new methodological orientations, new locations of study such as Asia, Canada and South America, and new responses to environmental harms. While a number of the original chapters have been revised, the second edition offers a range of fresh chapters covering new and emerging areas of study, such as: conservation criminology, eco-feminism, environmental victimology, fracking, migration and eco-rights, and e-waste. This handbook continues to define and capture the field of green criminology and is essential reading for students and researchers engaged in green crime and environmental harm.

The Oxford Handbook of the History of Crime and Criminal Justice Apr 09 2022 The historical study of crime has expanded in criminology during the past few decades, forming an active niche area in social history. Indeed, the history of crime is more relevant than ever as scholars seek to address contemporary issues in criminology and criminal justice. Thus, *The Oxford Handbook of the History of Crime and Criminal Justice* provides a systematic and comprehensive examination of recent developments across both fields. Chapters examine existing research, explain on-going debates and controversies, and point to new areas of interest, covering topics such as criminal law and courts, police and policing, and the rise of criminology as a field. This Handbook also analyzes some of the most pressing criminological issues of our time, including drug trafficking, terrorism, and the intersections of gender, race, and class in the context of crime and punishment. The definitive volume on the history of crime, *The Oxford Handbook of the History of Crime and Criminal Justice* is an invaluable resource for students and scholars of criminology, criminal justice, and legal history.

The Handbook of the Criminology of Terrorism Jul 12 2022 The Handbook of the Criminology of Terrorism features a collection of essays that represent the most recent criminological research relating to the origins and evolution of, along with responses to, terrorism, from a criminological perspective. Offers an authoritative overview of the latest criminological research into the causes of and responses to terrorism in today's world Covers broad themes that include terrorism's origins, theories, methodologies, types, relationship to other forms of crime, terrorism and the criminal justice system, ways to counter terrorism, and more Features original contributions from a group of international experts in the field Provides unique insights into the field through an exclusive focus on criminological conceptual frameworks and empirical studies that engage terrorism and responses to it

How to Conduct Qualitative Research in Social Science Dec 25 2020 Explaining both the theoretical and practical aspects of doing qualitative research, the book uses examples from real-world research projects to emphasise how to conduct qualitative research in the social sciences. Pranee Liamputtong draws together contributions covering qualitative research in cultural and medical anthropology, sociology, gender studies, political science, criminology, demography, economic sciences, social work, and education.

The Handbook of Homicide Feb 13 2020 The Handbook of Homicide presents a series of original essays by renowned authors from around the world, reflecting the latest scholarship on the nature, causes, and patterns of homicide, as well as policies and practices for its investigation and prevention. Includes comprehensive coverage of the complex phenomenon of homicide and its various forms Features original contributions from an esteemed team of global experts and scholars with chapters highlighting the authors' original research Represents the first internationally-focused collection of the latest research on the nature and causes of homicide Covers both the causes and dynamics of homicide, as well as policies and practices intended to address it

Families in Motion Jun 30 2021 This book is premised on the conceptualisation of family as always in motion, which in turn is determined by the interdependent mobilities of families and family members. Contributions from academics, from a range of disciplines, consider rhythms of change in the lived experiences of family and the ways in which they are produced through motion.

Conservation Criminology May 18 2020 This important new text introduces conservation criminology as the interdisciplinary study of environmental exploitation and risks at the intersection of human and natural systems. Taking an interdisciplinary approach, the book enhances understanding of the various human and organizational behaviors that pose risks to the environment, humans, and drive conservation crime. As human population growth, global market economies, climate change, deforestation, and illegal exploitation of natural resources continue to increase, academic research from numerous disciplines is needed to address these challenges. Conservation Criminology promotes thinking about how unsustainable natural resources exploitation is a cause and a consequence of social conflict. Case studies profiled in the book demonstrate this cause and effect type situation, as well as innovative approaches for reducing risks to people and the environment. This text encourages readers to consider how humans behave in response to environmental risks and the various mechanisms that constitute effective and ineffective approaches to enforcement of wildlife crimes, including environmental and conservation policy. Case studies from the USA, Latin America, Africa, and Asia highlight corruption in conservation, global trade in electronic waste, illegal fishing, illegal logging, human-wildlife conflict, technology and space, water insecurity, wildlife disease, and wildlife poaching. Taken together, chapters expand the reader's perspective and employ tools to understand and address environmental crimes and risks, and to provide novel empirical evidence for positive change. With established contributors providing interdisciplinary and global perspectives, this book establishes a foundation for the emerging field of conservation criminology.

Green Criminology Dec 05 2021 In the past three decades, a stream of criminological inquiry has emerged which explores, measures, and theorizes crimes and harms to the environment at the micro-, mezzo-, and macro-levels. This "green criminology", as it has come to be known, has widened the criminological gaze to consider crimes and harms committed against air, land (from forests to wetlands), nonhuman animals, and water in local, regional, national, and international areas or arenas. Accordingly, green criminology has endeavored to understand the causes and consequences of air and water pollution, biodiversity loss, climate change, corporate environmental crime (e.g., illegal waste disposal), food production and distribution, resource extraction and exploitation, and wildlife trade and trafficking, while also exploring potential responses to these issues. This book seeks to introduce the green criminological perspective to a broader social science audience. Recognizing that green criminology is not the first social science to explore the phenomena and harms at the intersections of humanity and ecology, this book offers an introduction to some of the unique insights developed over nearly 30 years of green criminological thought and scholarship to students, professors, researchers, and practitioners working in the fields of anthropology, economics, environmental humanities, environmental sociology, geography, history, and political ecology. This book contains contributions from researchers in green criminology from around the world, including early- and mid-career scholars, as well as more established voices in the field—all of whom are dedicated to exposing, understanding, and ultimately hoping to thwart further environmental degradation and despoliation.

Sentencing Policy and Social Justice Jan 14 2020 Sentencing Policy and Social Justice argues that the promotion of social justice should become a key objective of sentencing policy, advancing the argument that the legitimacy of sentencing ultimately depends upon the strength of the relationship between social morality and penal ideology. It sheds light on how shared moral values can influence sentencing policy at a time when relationships of community appear increasingly fragmented, arguing that sentencing will be better placed to make a positive contribution to social justice if it becomes more sensitive to the commonly-accepted moral boundaries that underpin adherence to the 'rule of law'. The need to reflect public opinion in sentencing has received significant attention more recently, with renewed interest in jury sentencing, 'stakeholder sentencing', and the involvement of community views when regulating policy. The author, however, advocates a different approach, combining a new theoretical focus with practical suggestions for reform, and arguing that the contribution sentencing can make to social justice necessitates a fundamental change in the way shared values about the advantages of punishment are reflected in penal ideology and sentencing policy. Using examples from international, comparative and domestic contexts to advance the moral and ethical case for challenging the existing theories of sentencing, the book develops the author's previous theoretical ideas and outlines how these changes could be given practical shape within the context of sentencing in England and Wales. It assesses the consequences for penal governance due to increased state regulation of discretionary sentencing power and examines the prospects for achieving the kind of moral transformation regarded as necessary to reverse such a move. To illustrate these issues each chapter focuses on a particularly problematic area for contemporary sentencing policy; namely, the sentencing of women; the sentencing of irregular migrants; sentencing for offences of serious public disorder; and sentencing for financial crime.

Theorising Green Criminology Dec 17 2022 Rob White's pioneering work in the establishment and growth of green criminology has been part of a paradigm shift for the field of criminology as it has moved to include crimes committed against the environment. For the first time, this book brings together a selection of White's essays that explore the theories, research approaches and concepts that have been instrumental to our understanding of environmental harm and eco-

justice. The book provides an additional foundation for scholarship that goes beyond expression of opinion or immediate empirical finding; the emphasis is on systematic analysis and theoretically informed consideration of complex realities. It serves as a platform for further debate and discussion of green criminology's theories, perspectives, approaches and concepts and their application to specific sub-areas such as environmental law enforcement, wildlife trafficking, pollution and climate change. Its aim is not to provide answers, but to stimulate further dedicated theoretical contemplation of environmental harms, threats to biodiversity and extinction of species. This is essential reading for all those engaged with green criminology, as well as criminological theory, eco-justice and environment and sustainability studies.

The Future of Criminology Aug 13 2022 Criminology is a dynamic and evolving field of study. In recent decades, the study of the causes, development, prevention, and treatment of juvenile delinquency and adult crime has produced many important discoveries. This volume addresses two questions about crucial topics facing criminology - from causation to prevention to public policy: Where are we now? What does the future hold? Rolf Loeber and Brandon C. Welsh lead a team of more than forty top scholars from across the world to present the future of research, policy, and practice in the discipline.

The Routledge Handbook of Qualitative Criminology Aug 01 2021 Despite illustrious origins dating to the 1920s, qualitative crime research has long been overshadowed by quantitative inquiry. After decades of limited use, there has been a notable resurgence in crime ethnography, naturalistic inquiry, and related forms of fieldwork addressing crime and related social control efforts. The Routledge Handbook of Qualitative Criminology signals this momentum as the first major reference work dedicated to crime ethnography and related fieldwork orientations. Synthesizing the foremost topics and issues in qualitative criminology into a single definitive work, the Handbook provides a "first-look" reference source for scholars and students alike. The collection features twenty original chapters on leading qualitative crime research strategies, the complexities of collecting and analyzing qualitative data, and the ethical propriety of researching active criminals and incarcerated offenders. Contributions from both established luminaries and talented emerging scholars highlight the traditions and emerging trends in qualitative criminology through authoritative overviews and "lived experience" examples. Comprehensive and current, The Routledge Handbook of Qualitative Criminology promises to be a sound reference source for academics, students and practitioners as ethnography and fieldwork realize continued growth throughout the 21st Century.

Emerging Issues in Green Criminology Mar 28 2021 This edited collection brings together internationally renowned scholars to explore green criminology through the interdisciplinary lenses of power, harm and justice. The chapters provide innovative case study analyses from around the world that seek to advance theoretical, policy and practice discourses about environmental harm.

Criminological Theory May 30 2021 Offering a rich introduction to how scholars analyze crime, Criminological Theory: Context and Consequences moves readers beyond a commonsense knowledge of crime to a deeper understanding of the importance of theory in shaping crime control policies. The Sixth Edition of the authors' clear, accessible, and thoroughly revised text covers traditional and contemporary theory within a larger sociological and historical context. J. Robert Lilly, Francis T. Cullen, and Richard A. Ball include new sources that assess the empirical status of the major theories, as well as updated coverage of crime control policies and their connection to criminological theory.

Towards a Malaysian Criminology Apr 28 2021 This book provides a critical analysis of criminological scholarship in Malaysia, presenting a focused exploration of the key qualities and limitations to studies on crime, deviance, victimization and criminal justice in this country. This text connects contemporary crime problems with historical legacies such as the impact of colonialism and the influence of ethno-nationalism and authoritarianism in the region. Conflict and tension created by legal pluralism is illustrated via three case studies exploring apostasy, Islamic rehabilitation centres, and retention and use of the death penalty. In addition to a critique of contemporary Malaysian criminological scholarship, Towards a Malaysian Criminology suggests a composite, critical criminological approach to guide future research. This approach draws on theoretical traditions in critical race theory, critical realism, ultra-realism and the emerging field of Islamic critical realism. Given the multidisciplinary nature of the discipline, this text will appeal to scholars of criminology, sociology, law, politics and Islamic theology.

Fundamentals of Criminological and Criminal Justice Inquiry Apr 16 2020 A fundamental introduction on how to think about, do, and evaluate research in the criminology and criminal justice field.

The Routledge Handbook of White-Collar and Corporate Crime in Europe Oct 15 2022 The study of white-collar crime remains a central concern for criminologists around the world and research concentrates on its nature, prevalence, causes and responses. However, most books on white-collar crime tend to focus on Anglo-American examples, which is surprising given the amount of rich data and research taking place in mainland Europe. This new handbook seeks to reset the balance and, for the first time, presents an overview of state-of-the-art research on white-collar crime in Europe. Adding to the existing Anglo-American body of knowledge, the Handbook will discuss specific European topics and typical European features of white-collar crime. The Routledge Handbook of White-Collar and Corporate Crime in Europe consists of more than thirty chapters on topics ranging from the Icelandic Banking Crisis, to the origins of the study of white collar crime, to contemporary topics, such as white-collar crime in countries post-transition from communist regimes; the illegal e-waste trade and white-collar crime in professional football. Furthermore, the book contains extensive case study analyses of landmark European cases of white-collar crime. The editors have gathered together the leading voices in the field and a final section offers commentaries on white-collar crime in Europe from eminent criminologists David Friedrichs and Hazel Croall. This Handbook will thus serve as a work of reference for all scholars and students engaged in the study of corporate and white-collar crime and will also set out directions for new research in the future.

Green Cultural Criminology Feb 19 2023 Over the last two decades, "green criminology" has emerged as a unique area of study, bringing together criminologists and sociologists from a wide range of research backgrounds and varying theoretical orientations. It spans the micro to the macro—from individual-level environmental crimes and victimization to business/corporate violations and state transgressions. There have been few attempts, however, to explicitly or implicitly integrate cultural criminology into green criminology (or vice versa). This book moves towards articulating a green cultural criminological perspective. Brisman and South examine existing overlapping research and offer a platform to support future excursions by green criminologists into cultural criminology's concern with media images and representations, consumerism and consumption, and resistance. At the same time, they offer an invitation to cultural criminologists to adopt a green view of the consumption landscape and the growth (and depictions) of environmental harms. Green Cultural Criminology is aimed at students, academics, criminologists, and sociologists with an interest in green criminology and cultural criminology: two of the most exciting new areas in criminology today.

Green Criminology Jan 18 2023 Over the past ten years, the study of environmental harm and 'crimes against nature' has become an increasingly popular area of research amongst criminologists. This book represents the first international, comprehensive and introductory text for green criminology, offering a concise exposition of theory and concepts and providing extensive geographical coverage, diversity and depth to the many issues pertaining to environmental harm and crime. Divided into three sections, the book draws on a range of international case studies and examples, and looks at the conceptual and methodological foundations of green criminology, before examining in detail areas of environmental crime and harm, and how they are addressed, including: climate change and social conflict; abuse and harm to animals; threats to bio-diversity; pollution and toxic waste; environmental victims; environmental regulation, law enforcement and courts; environmental forensic studies; environmental crime prevention. Green Criminology is packed with pedagogical features, including dialogue boxes, case examples, discussion questions and lists of further reading and is perfect for students around the world engaged with green criminology and crime against the environment.

Conservative Criminology Oct 11 2019 Conservative Criminology serves as an important counterpoint to virtually every other academic text on crime. Hundreds of books have been written about crime and criminal justice policy from a variety of perspectives, including Marxist, liberal, progressive, feminist, radical, and post-modernist. To date, however, no book has been written outlining a conservative perspective on crime and criminal justice policy. Not a polemic against liberalism, Conservative Criminology nonetheless focuses on how liberal ideology affects the study of crime and criminals and the policies that criminologist advocate. Wright and DeLisi, both senior scholars, give a voice to a major political philosophy—a philosophy often demonized by academics—and to conservatives in the academic world. In the end, Conservative Criminology calls for an investment in intellectual diversity, a respect for varying political philosophies, and a renewed commitment to honesty in scholarship. The authors encourage debate in the profession about the proper role of ideology in the academy and in public policies on crime and justice. Conservative Criminology is for the criminal justice professional and student. It serves as a stimulating supplement to courses in criminology and criminal justice, as well as a primary text for special issues or capstone courses. This book supports the reader in recognizing ideological biases, whatever they might be, and in considering their own convictions.

Introducing Criminological Thinking Aug 21 2020 Visual techniques for applying criminological theory to social science research Introducing Criminological Thinking: Maps, Theories, and Understanding is an accessible and user-friendly criminological theory text for students, instructors and researchers. In addition to the unique use of concept maps, mind maps, and other visual techniques to consider theory-based inquiry, this text combines an exploration of the core elements of theory with relevant examples drawn from biology, psychology, sociology, critical traditions, and integrative efforts. Unlike in other theory texts, the chapters are arranged by level of explanation to help students understand how theories from different disciplines interact with each other as a foundation for many contemporary criminological theories. Authors Jon Heidt and Johannes Wheeldon have developed a seven-step model to identify key aspects of different theories including their historical and social context, base assumptions, scope, problem foci, terms/concepts, related research, and practical ramifications. This text offers both a student-friendly theoretical discussion and accessible visual examples to explain criminological theory and its applicability to social science research.

Vandalism and Anti-Social Behaviour Jun 11 2022 Vandalism and Anti-Social Behaviour forwards a new typology of vandalism. The authors argue that in order to fully understand vandalism and anti-social behaviour, a culturally criminological perspective should be fostered, which accounts for the emotional and experiential aspects of crime.

Sport and Crime Nov 23 2020 This is the first book to explore fully the connections between sport studies and criminology, opening up critical new frontiers in the study of sport and crime. Rooted firmly in established critical criminological traditions, the book also employs insights from emerging theoretical frameworks such as cultural criminology, governmentality theory and critical security studies to make better sense of a range of transnational and contemporary cases, events and trends that reveal, in different ways, the crimes and harms that are present in sport. Empirically grounded, including case studies of the 2022 World Cup in Qatar and the Tokyo 2020 Olympic Games, it explores emerging themes in contemporary sport, including but not limited to corruption, doping, youth crime, terrorism, violence and transgression, and human rights abuses. Sport and Crime consciously pushes the boundaries of what might be considered the critical criminology of sport. This is an essential text for any course on sport and crime, and invaluable reading for any student or researcher with an interest in the sociology of sport, sport development, sport policy, the politics of sport, critical criminology, or socio-legal studies.
