Citroen Jul 13 2022 In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned

photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

Ambient Intelligence - Software and Applications Apr 29 2021 This volume contains the proceedings of the 6th International Symposium on Ambient Intelligence (ISAmI 2015), held in Salamanca, Spain on June 3th-5th at the University of Salamanca. After a careful review, 27 papers from 10 different countries were selected to be presented in ISAmI 2015 at the conference and published in the proceedings. ISAmI has been running annually and aiming to bring together researchers from various disciplines that constitute the scientific field of Ambient Intelligence to present and discuss the latest results, new ideas, projects and lessons learned, namely in terms of software and applications and aims to bring together researchers from various disciplines that are interested in all aspects of this area. Ambient Intelligence is a recent paradigm emerging from Artificial Intelligence, where computers are used as proactive tools assisting people with their day-to-day activities, making everyone's life more comfortable. Another main concern of AmI originates from the human computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means user friendly interfaces. This field is evolving quickly as can be witnessed by the emerging natural language and gesture based types of interaction.

Advances in Ergonomics in Design Oct 04 2021 This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and evaluation, of products, systems and services. It gathers theoretical contributions, case studies and reports on technical interventions focusing on a better understanding of human machine interaction, and user experience for improving product design. The book covers a wide range of established and emerging topics in user-centered design, relating to design for special populations, design education, workplace assessment and design, anthropometry, ergonomics of buildings and urban design, sustainable design, as well as visual ergonomics and interdisciplinary research and practices, among others. Based on the AHFE 2021 International Conference on Ergonomics in Design, held virtually on 25–29 July, 2021, from USA, the book offers a thought-provoking guide for both researchers and practitioners in human-centered design and related fields.

Car May 31 2021 From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book

about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity. Extensive catalogues showcase the most important marques and models, organized in categories such as sports cars, convertibles, and city compacts. The book also features virtual photographic tours of some of the most iconic cars from each era such as the Rolls Royce Silver Ghost, Ford Model T, Lamborghini Countach, and Ferrari F40, while cross-sections of key engines explore the driving force behind them. Lavishly illustrated feature spreads detail the stories of the men, machines, and magic that helped create the car world's most famous marques and made brands such as Porsche, Mercedes-Benz, Aston Martin, and Cadillac household names. If you love cars, then you'll love Car. It is simply a must-have title for all car enthusiasts.

Creativity Jan 27 2021 Creativity: Theory, History, Practice offers important new perspectives on creativity in the light of contemporary critical theory and cultural history. Innovative in approach as well as argument, the book crosses disciplinary boundaries and builds new bridges between the critical and the creative. It is organised in four parts: Why creativity now? offers much-needed alternatives to both the Romantic stereotype of the creator as individual genius and the tendency of the modern creative industries to treat everything as a commodity defining creativity, creating definitions traces the changing meaning of 'create' from religious ideas of divine creation from nothing to advertising notions of concept creation. It also examines the complex history and extraordinary versatility of terms such as imagination, invention, inspiration and

originality creation as myth, story, metaphor begins with modern re-tellings of early African, American and Australian creation myths and – picking up Biblical and evolutionary accounts along the way – works round to scientific visions of the Big Bang, bubble universes and cosmic soup creative practices, cultural processes is a critical anthology of materials, chosen to promote fresh thinking about everything from changing constructions of 'literature' and 'design' to artificial intelligence and genetic engineering. Rob Pope takes significant steps forward in the process of rethinking a vexed yet vital concept, all the while encouraging and equipping readers to continue the process in their own creative or 're-creative' ways. Creativity: Theory, History, Practice is invaluable for anyone with a live interest in exploring what creativity has been, is currently, and yet may be.

Company Strategies and Organisational Evolution in the Automotive Sector Dec 06 2021 This book is published during a phase of crisis and transformation for the automobile industry across the world; this crisis is particularly acute in Europe and the United States. The book is written especially for the non-specialist with more than a passing interest in the sector, such as experts of other sectors, trade unionists, representatives of the corporate world, policymakers and public managers who deal with industry, commerce and public planning. The authors provide up-to-date information and assessments of what is actually taking place, with particular attention paid to the sub-supply companies. The main focus lies on four European countries, Germany, Spain, Sweden and Italy, each of which is significant for its different experiences. Finally, three important non-European situations, the United States, Brazil and Japan, are examined.

Barthes' "Mythologies" Today Dec 26 2020 This is Barthes' seminal text reimagined in a contemporary context by contemporary academics. Through a revisiting of *Mythologies*, a key text in cultural and media studies, this volume explores the value these disciplines can add to an understanding of contemporary society and culture. Leading academics in media, English, education, and cultural studies here are tasked with identifying the "new mythologies" some fifty or so years on

from Barthes' original interventions. The contributions in this volume, then, are readings of contemporary culture, each engaging with a cultural event, practice, or text as mythological. These readings are then contextualized by an introduction which reflects on the 'how' of these engaging responses and an "essay at the back of the book" which replaces Myth Today with a reflection on the contemporary provenance of both Barthes and his most famous book. Thus the book is at least two things at once whichever way you look: a 'new' Mythologies and a book about Barthes' legacy, an exploration of the place of theory in critical writing, and a book about contemporary culture.

Ekonom Oct 24 2020

La contabilità dei costi del personale Jun 12 2022 La contabilizzazione dei costi del personale rappresenta, anche per gli addetti ai lavori, un'operazione non sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio – soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via – e alle conseguenti ripercussioni, in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fondamenta soggiacciono i principi contabili, si caratterizza per il gran numero di esempi – che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda – volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto "cedolone", vale a dire il riassunto avvenuto nel periodo di lavoro considerato. Andrea Sergiacomo Dottore commercialista, Revisore legale dei conti, Mediatore civile, componente della Commissione cooperative O.D.C.E.C. di Roma e componente della Commissione diritto societario O.D.C.E.C. di Tivoli. Svolge attività pubblicitica per riviste specializzate in materia di bilancio, fisco e operazioni straordinarie.
