They were proposed for inclusion in the Biological Weapons Convention but never adopted. In addition to a discussion of each of these classes of agents, coverage includes detailed information on a broad spectrum of individual agents that have been used on the battlefield, stockpiled as weapons, used or threatened to be used by terrorists, or have been otherwise assessed by qualified law enforcement and response organizations and determined to be agents of significant concern. The information presented in this edition has been updated and expanded to contain more information on toxicology, health effects, presentation of diseases, advances in medical care and treatment, as well as protective actions needed at the scene of an incident. Key Features: Focuses on the key information needed during an emergency response Provides updated toxicology, exposure hazards, physical-chemical data, and treatment of casualties Profiles the presentation of diseases in people, animals and plants Presents updated protective action distances, decontamination, and remediation information All data compiled is gathered from numerous sources and arranged into the current, easy-to-access format. Repatriation of Sacred Indigenous Cultural Heritage and the Law Nov 23 2020 This book examines the ways in which law can be used to structure the return of indigenous sacred cultural heritage to indigenous communities, referred to as repatriation in this volume. In particular, it aims at developing legal structures that align repatriation with contemporary international human rights standards. To do so, it gathers the most valuable lessons learned from different repatriation laws and frameworks adopted in the United States and Canada. In both countries, very different ways of approaching repatriation have been used for several decades, highlighting the context-dependent nature of repatriation. The volume is divided into four parts, looking first at international law, then at the national legal landscape in the United States, followed by Canada, before the different repatriation models are evaluated against the backdrop of human rights law standards. Emphasis is placed not only on repatriation-specific legislation but also on the legal context in which it was developed and operates. In turn, the fourth part develops various models on the basis of these experiences that can be aligned with contemporary

indigenous and cultural rights. The book ends by considering the models' suitability for international repatriation and the lessons that can be learned from them. The primary audience includes those addressing the legal hurdles to repatriation, be they researchers, policymakers, communities, or museums.

Thumbing a Ride Jan 14 2020 As a national network of roads and hostels spread across Canada, so did the practice of hitchhiking. *Thumbing a Ride* examines its rise and fall in the 1970s, drawing on records from the time. Many equated adventure travel with freedom and independence, but a counter-narrative emerged of girls gone missing and other dangers. Town councillors, community groups, and motorists demanded a clampdown on a transient youth movement they believed was spreading anti-establishment nomadism. Linda Mahood asks new questions about hitchhiking as a rite of passage, and about adult intervention that turned a subculture into a pressing moral and social issue.
